Task	Tubing	Risk Assessment No.	RAB 004
Name of Assessor	J Freshwater	Signature	jf
Assessment Date	11-09-2025	Review Date	11-09-2026

What are the significant hazards?	Who might be harmed and how	What are you already doing	Do you need to do anything else to control the risk?	Action by Who	Action by Date	Completion Date
Injury from damaged tube	Staff and visitors at risk of being flung out of tube	Check each tube before each session for cracks	Look after tubes when pulling them out and putting them away  Try not to bend the bases with force	Instructors and clients	immediate	immediate
Injury crossing the road	Staff and visitors at risk of being hit by cars	Briefing given before leaving the building Crossings supervised. Use the slope gate to stop traffic	Make sure a responsible adult is supervising	Parents, instructors, or other adults	immediate	Immediate
Injury from kit left on slope	Staff and visitors	Safety briefing given prior to activity starting	Ensuring all kit is stored correctly when not on session	Instructor.	immediate	Immediate

	may collide with equipment left on the slope	Remove all unnecessary equipment from the slope prior to starting session.				
Falling out of tubes, running into other people or hitting wall with force.	Staff and visitors could get injured from hitting the wall or injury from colliding with others	Appropriate clothing to be worn. Helmets must be worn at all times when on slope. Descents managed by group leader, a maximum of 2 persons sliding at any one time. None tubers not allowed on slope,  LANDING AREA MUST BE CLEAR before next descent	Brief all staff -  Slope speed varies greatly depending on the weather conditions.  Wetter weather will make the tubes go faster.  Guests walking back up must hold the rope.	Instructor	immediate	<b>Immediate</b>
Premature starters	Staff and visitors could be hit by slope users starting to soon	Start heights are strictly adhered to and monitored by the group leader  Strategic positioning of staff to maintain no premature descents before the landing zone is clear	Make sure a trained group leader is present and supervising during all sessions.	instructor	immediate	<b>Immediate</b>
Falling out at the top of ¼ pipe	Staff and visitors could fall out of the tube	Start from the appropriate height so as not to clear the jump.	Long sleeves and long trousers must be worn in case.	instructor	instructor	instructor
